Evergreens

In comparing the prices of our evergreens with those of other nurseries keep in mind that our plants are frequently transplanted in order to secure a good fibrous root system, they are sheared from time to time as needed, consequently they are all bushy, well formed plants. All of our evergreens are balled and burlapped at the prices quoted and the burlap is sewed on, not just tied with rope.

These heavy specimen American Arbor Vitae were transplanted two years ago, and carry a large ball of earth. They were closely sheared and are now very compact plants. Most of these plants spread from 4 to 5 feet at the ground, and are mostly sheared to a point at the top.

These plants are a part of the heavy stock listed above but they are bare on one side ranging from 1½ ft. to 3 ft. from the ground, but in other respects they are as good as the specimens listed above, but on account of this defect we are offering them at a less price than the “Specimen” plants.

When these plants are ordered it must be specified in the order, “Bare on one side” otherwise the specimen plants will be shipped and priced accordingly.

Hardy Herbaceous Perennials

The herbaceous plants offered in this list are all strong, field grown clumps, they are not small divisions such as offered by most nurserymen. In such plants that are of a character as to make them readily divisible it would be possible to divide our plants into from two to four plants of the sizes usually offered for sale. This fact should be given careful consideration when comparing our prices with others. It is a recognized fact that these strong field grown clumps give far better results than divided or small pot grown plants.

July to September, etc., indicates the period of flowering.

PRICES: Five plants sold at the rate quoted per ten, twenty-five at the hundred rate. Cost of box and packing additional.

When cash is sent with order include 15 per cent of the amount of the purchase price to cover cost of box and packing.
